Asynchronous induction low voltage (220/380/660V, 50Hz) three-phase and single-phase electric motors made in the People's Republic of China.

Practical data of windings.

Rev. 09 03 February 2025

sn - sequence number In tables

type - motor name

P – power, κW

U - voltage, *U stat.*, *rot.* – stator voltage, rotor voltage.

In - rated current, In stat, rot. - stator rated current, rotor rated current, Inl - no-load current, Ampere

con – connection, wye or delta (star or triangle)

C, μ F – capacitor, microfarads

 Z_1 , Z_2 – amount of stator slots, rotor slots

Da – external stator diameter

Di – inner stator diameter

L – stator length (i+ ventilation gap)

δ – air gap

d – wire diameter and \times - amount wires in turns, or $a \times b$ size rectangular conductor

y - winding pitch

S – coils in group

u – amount coils of group

Nz – turns in slot, Nc – coil turns, Nph – phase turns

NRz – turns in run winding, NAz – turns in auxiliary winding

a - parallels in phase (if 1 – no parallels)

All data at U = 380 V with appropriate \triangle or Y connection (con), unless otherwise specified. The last digit in the motor designation usually indicates the number of poles. All dimensions in millimeters.

Use Ctrl + letter F to search
